MP2E-SOLUTIONS

MP2E Solutions and LUM launch a strategic partnership for the French market, offering enhanced solutions for industry and science

Berlin, 18 February 2026:

LUM is a renowned authority in scientific and measurement-technology expertise, specializing in particle characterization, stability evaluation of suspensions and emulsions, determination of adhesive strengths and quality assurance and process optimization. Their solutions extend across diverse sectors including industrial, food, cosmetics, pharmaceutical enterprises, and academia. 'Made by LUM' analytical instruments are standard in R&D and QA/QC departments, enabling successful product development and formulation. Recognized for patented technologies and application science studies, LUM serves as a scientific partner, sponsor, and contributor in various international standards organizations and technology promotion initiatives.

The new partnership between MP2E SOLUTIONS and LUM GmbH launched on February 1, 2026. It now offers French customers enhanced solutions by combining over 10 years of experience in mixing with LUM's comprehensive analytical expertise in products and processes, gained from over 30 years of experience. Susanne Lerche-Merchant, CEO of LUM GmbH, said: "We are delighted to partner with MP2E Solutions in our international sales network. This allows us to respond more quickly and effectively to all inquiries from France – from sales and support to technical service for the instruments. With MP2E Solutions, we can significantly increase the number of our French experts for LUM products, enabling faster response times. Thanks to MP2E Solutions' expertise, our range of applications is also expanding. We were pleased to welcome 40% of MP2E Solutions' employees to our 2026 international sales meeting and subsequent intensive training in Berlin."

Emmanuelle Etiemble, CEO of MP2E SOLUTIONS: "We are delighted with the development of this new partnership and the trust placed in our company. The LUM product lines are of great interest to our customers, and we look forward to continuing our collaboration with LUM users throughout France. Thanks to the synergies of all range of equipment: from fast formulation to fast analysis answer, we can serve existing and new customers at a new level. MP2E SOLUTIONS is equipped with its own LUM instruments. By that way we will continue to offer our well-known service as live demonstrations, customer sample testing, and contract analyses".

Both companies will be happy to welcome you on two events next months:

In March 24th – 26th for Eurocoat 2026 where our best-selling LUMiSizer, the new LUMiReader X-Ray 440, and the LUMiFrac will be presented at booths C10 and C09.

Press release

MP2E-SOLUTIONS

On April 14th – 16th we join forces once more for in-Cosmetics 2026. Meet us at booth 1C60A and discover the new LUMiReader X-Ray 440 by registering for the formulation lab session on April 16.

About MP2E SOLUTIONS

MP2E Solutions is the exclusive distributor of Hauschild SpeedMixer™ mixing equipment and TIDAS gages analyser in France. With extensive experience in the laboratory sector and in chemistry in general, MP2E Solutions offers its expertise in both mixing equipments and analysis solutions. From demonstration to service, MP2E Solutions is offering to its customers a complete support.

About LUM GmbH

LUM GmbH was founded in 1994 by the Managing Director Prof. Dr. Dr. Dietmar Lerche as innovative development, production and service corporation. The headquarters are located in Berlin, Germany. The company has three subsidiaries: LUM Corporation, USA, LUM (Jiangsu) Instruments Co. Ltd, China, and LUM Japan Co., Ltd.

LUM GmbH consists of a highly qualified, multidisciplinary team of scientists, technicians and engineers. Scientific and measurement-technology expertise has been obtained for decades in:

- Particle characterization
- Analysis of suspensions and emulsions, including stability evaluation
- Determination of adhesive and bonding and strengths
- Quality assurance and process optimization.

This knowledge and its continuous extension form the basis for customer-oriented problem solving, product developments and services for our national and international customers, working in larger industrial, food, cosmetics, pharmaceutical enterprises and increasingly in the academic sector. The innovative analytical instruments 'made by LUM' are part of standard laboratory equipment in many R&D and QA/QC departments. LUM instruments enable our customers successfully to develop and formulate new and improved products and introduce them onto the market, following our slogan:
The Next STEP in Dispersion Analysis and Materials Testing.
